

ADVANCED ARCHITECTURAL DESIGN WORKSHOPS MAYA _ GRASSHOPPER .:PRECISE INACCURACY.: JULY 2016, ATHENS

ArchitectScripta Summer Workshops 2016 :

RECEIVING APPLICATIONS NOW : workshops@architectscripta.com

For more information follow : www.architectscripta.com

Participation cost is 550 euros for each workshop

X|A ATHENS Workshop I: 27th of June -7th of July 2016 @ Benaki Museum in Athens, Greece

X|A ATHENS Workshop II: 11th of July - 21st of July 2016 @ Benaki Museum in Athens, Greece

ArchitectScripta is organizing two international intensive workshops of Advanced Architectural Design under the Thinking Tank of *.:PRECISE INACCURACY.:* based on Maya and Grasshopper techniques. The ArchitectScripta Summer Workshops 2016 are led by ArchitectScripta Principal Nefeli Chatzimina (University of Southern California, NTUA) and USC Professor Justin Brechtel (University of Southern California) both Alumni Graduates of Columbia University in New York City , with Nikos Papavasileiou (ArchitectScripta Project Architect)

ArchitectScripta Athens Workshops I & II are organized under the auspices of the Hellenic Institute of Architecture and the Athens School of Fine Arts. Selected Participants will attend the computation design workshops, academic lectures, final reviews and exhibition at Benaki Museum of Athens from 27th of June until the 7th of July 2016 or from the 11th until the 21st of July 2016. Daily meetings will take place from 10am to 6pm at the Benaki Museum of Pireos 138 in Athens.

As part of an ongoing academic research, ArchitectScripta Workshops introduce participants into contemporary discussions of formal exploration in Architecture and Art. Through technical attainment of design and digital production the ArchitectScripta Workshops give the opportunity to students of Architecture and Art, Professional Architects, Designers and Artists to challenge new design territories. Our goal is to explore innovative, potential architectural expressions of the current discourse around Form through computational tools (Autodesk MAYA, Grasshopper Rhino). We will focus on technique elaboration, material intelligence, formal logic efficiencies and precision assemblies as an ultimate condition of design. The workshop will develop and investigate the notion of proficient geometric variations at a level of complexity, so that questions towards geometrical effectiveness, accuracy and performance can begin to be understood in a contemporary setting. The workshop is a discourse based in the use of multi-layered techniques and production processes that allow for control over intelligent geometries, calibration of parts, and behavioral taxonomies, normalizing an innovative held of predictability.

ATHENS SCHOOL OF FINE ARTS
POSTGRADUATE PROGRAM
DEPARTMENT OF DIGITAL ARTS

ArchitectScripta was founded in 2007 by Nefeli Chatzimina :aS: is an architectural practice based in the use of multi-layered experimental techniques and production processes networked in Europe and the US. Principal holds a Master of Science in Advanced Architectural Design from Columbia University and has graduated N.T.U.Athens. Teaching expertise extends to the University of Southern California and N.T.U.Athens. ArchitectScripta 's work has been internationally published and exhibited at galleries in New York, Los Angeles, London, Lexington and Barcelona. Their working experience is held in offices of Bernard Tschumi Architects in New York and Xefirotarch LA
